BEFORE THE UTAH AIR QUALITY BOARD

In Re: Approval Order dated	*	
May 4, 2007, and action taken	*	Save Our Air & Resources
as described in Executive Secretary's	*	Memorandum in Support of
letter of June 6, 2007 to Fred W.	*	Agency Action and Response
Finlinson, In the matter of Sevier Power	*	to Notification of Further
Company's 270 MW Coal-fired Power	*	Proceedings, Hearing
DAQE-AN2529001-04	*	Schedule
Permit Code N2529-001	*	
	*	

Comes now, the petitioners in this case, requests the Utah Air Quality Board to approve our Request for Agency Action and our proposed schedule, as suggested in the Notification of Further Proceedings. Due to time constraints, the petitioners suggest the following sequence of events. We submit this in the spirit of cooperation with all parties involved and so as not to delay matters previously agreed upon by the parties in this case. Save Our Air & Resources(SOAR), James O. Kennon, and Dick Cumiskey, offers this sequence of actions for consideration by all parties. At the September 5,2007, Air Quality Board meeting, two agenda items would be considered. The first

item would be, "Save Our Air & Resources Petition to Intervene". Once that is resolved, the following schedule could be approved and included in the October 1, 2007, date set for SPC hearings.

Proposed Schedule

October 1, 2007 - Starting time for hearing 8:00 A.M.. Sierra Club begins.

At the conclusion of the Sierra Clubs arguments on the 18 month extension and BACT, a break would be taken. The Agency Action for SOAR could then be heard. The Sierra Club and Grand Canyon Trust would continue with the rest of their arguments. Save Our Air & Resources could follow the Sierra Clubs presentation on the 18 month extension or after the opposing parties argue their side. In any case, that would provide an extra hour in the day for the petitioners arguments and would serve the needs of the Board. It is necessary for the petitioners to have a separate time slot as we are going to be presenting arguments that do not contain BACT regulations and present evidence from a different view point than the Sierra Club. This schedule will shorten the petitioners presentation due to the Sierra Club presenting their case prior to our hearing of the issue.

Conclusion

The above memorandum as outlined will provide the Petitioners with a

a separate time for their hearing and still satisfy the mandate of the people we represent. Evidence will be presented by the petitioners from a different perspective and provide a better understanding of the issue in this case. This will also provide a separate transcript that the members of SOAR will be able to more fully understand. At the same time it will serve justice and due process.
